

Hon. C. Stewart Has Plan for the Alberta Dry Area

WOULD BUY LAND FROM PRESENT FARMERS AND TURN IT OVER TO RANCHERS. WHO SHOULD ALSO TAKE SOME IRRIGATED LAND TO RAISE FEED.

A scheme for the relief of the drought-stricken ranches in the eastern Alberta and Southwestern Saskatchewan has been suggested to the Alberta government by Hon. C. Stewart, minister of the interior.

Mr. Stewart's proposition is to buy out the settlers at present endeavoring to farm this territory, and resell the country with ranches, such as water facilities. In addition to this, Mr. Stewart would endeavor to have the new ranchers take up small parcels of about 80 acres of irrigated land. The Canada Land and Irrigation Company property is just to the east of the dry belt, and the company is now involved, and the solution seems to be that the federal government will take it over.

Mr. Stewart has suggested to the Alberta government that the commission be appointed to go into the district, make a survey to buy out the settlers as ranchers the present population. Very little of the land is now in the hands of the settlers. Some of it is owned by the federal government, and the rest is mainly controlled by the mortgage companies.

Mr. Stewart makes no bones about the fact that the government and the mortgage companies should have written off a loss in freer settlement by their abolition but that the voter settlement in the country would be more than compensated for this.

Heaving control of the country once more he would resettle it with ranchers, who, in his opinion, would not have to pay more than \$500 per acre for their holdings. He would endeavor to have these ranches use irrigated lands in the west and by combining this with the present conditions of pasture and would be relieved of the dry conditions.

The irrigated lands are just about 100 miles away from the ranges, not too far to drive cattle for wintering. The irrigated lands would cost about \$100 per acre, and Mr. Stewart considers a man could sell \$400 per acre for stock. The scheme would cost very little, and could be financed by the federal government. The proposition at present awaits consideration by the Alberta government, and no further steps will be taken until an expression of opinion is received.

Sapiro to Support Davis for President

ARON Sapiro, the wizard of economic marketing has come out strong and direct for the candidature of J.W. Davis, Democratic nominee of the United States.

Mr. Sapiro said Mr. Davis personifies the qualities of leadership and is wonderfully qualified to lead the people of the world in this time of crisis.

His foreign policy is common sense policy for the United States, and his policy of isolation keeps our country out of its greatest economic world leadership," he concluded.

Mr. Sapiro said he believed Davis would carry Colorado, Nebraska and several other Western States.

Mr. Davis is a man with a practical plan backed by a large and practical staff that knows how to get things done. This will appeal to the farmers, he asserted.

Alberta to Fight The Weed Menace

Never before in the history of the rural districts of Alberta has the weed menace as the case in Alberta this year. Through the efforts of the Field Crops Branch of the Department of Agriculture at Edmonton, a strong campaign has been built up through almost the entire province to combat the weed menace.

Mr. H. W. Wood, chairman of the Board of trustees, has left for Winnipeg, to attend a meeting of the Canadian Co-operative Weed Control Association.

ALBERTA POOL NOW HAS NEARLY ALL ELEVATORS

Nearly all the elevator companies of the province have now entered into contracts with the Alberta Pool for the handling of grain, said E. Gorman, secretary of the pool. Eleven more contracts were received Monday, making a total of 46 elevator companies now signed up. 46 before the number of those who signed contracts last year.

Says Railway Rates Now Need Adjusting

Amplifying the statement above, Dr. King declared that for many years past the railway has been working on a policy of expediency. Instead of trying to bring down on an economic and scientific basis, they have simply been able to bring it down by adding and subtracting to or from original tariffs as recurrent circumstances dictated. Today no one knows where they are at.

United States Buyers After Candian Hogs

Canada has been endeavoring during the past three years to encourage the production of bacon hogs. At times it has been successful, and has been able to sell a considerable quantity of the product from the land hog. Consequently prices for the hog have risen in Canada. As a result of increased interest in bacon production in certain states of the United States, the United States buyers are now in the market for the product from the land hog. Consequently prices for the hog have risen in Canada. As a result of increased interest in bacon production in certain states of the United States, the United States buyers are now in the market for the product from the land hog.

The Canadian National Railway has been endeavoring to encourage the production of bacon hogs in preference to the land hog. The Canadian National Railway has been endeavoring to encourage the production of bacon hogs in preference to the land hog. The Canadian National Railway has been endeavoring to encourage the production of bacon hogs in preference to the land hog.

Will Hear Complaints On Crow's Nest Rates

Complaints of discrimination resulting from the restoration of rates provided for in the Crow's Nest Pass Agreement will come before the Board of Railway Commissioners of Canada for hearing.

The complaints are not localized in any particular section of the Dominion. British Columbia, through its Premier Hon. John Oliver, will make a statement in the House of Commons on the subject of the Crow's Nest Pass Agreement.

Will Stock Alberta Waters With Fish

Government fish hatcheries at Qu'Appelle and on the Bow are breeding the famous Ontario black bass, which are being stocked in the waters of the province. Perch and other fish will also be placed in lakes that are at present barren of fish life. Adult black bass from Ontario lakes will be placed in a number of ponds throughout the province for the purpose of propagation of the species in that province.

DRIVE FOR POOL MEMBERS IS NOW IN PROGRESS

Circulars are being distributed to members of the Alberta Wheat Pool, and the farmer who succeeds in securing a new member will receive a bonus of \$100. The drive that is now in progress. It was started on Monday, and the drive that is now in progress. It was started on Monday, and the drive that is now in progress. It was started on Monday, and the drive that is now in progress.

ALBERTA POOL NOW HAS NEARLY ALL ELEVATORS

Nearly all the elevator companies of the province have now entered into contracts with the Alberta Pool for the handling of grain, said E. Gorman, secretary of the pool. Eleven more contracts were received Monday, making a total of 46 elevator companies now signed up. 46 before the number of those who signed contracts last year.

BINGVILLE COULD MARRIED

Miss Katherine Beck and Mr. August Johnson, of Bingville, Quebec, were married in Calgary, Friday, September 12, 1924.

WEALTH IN WOOL INDUSTRY

It has been estimated that southern Alberta sheep and wool industry this year will bring about an increase of 10 per cent over last year.

The Eleventh Fortnightly Crop Report

Harvesting operations are about 75 per cent completed in the southern portions of Alberta, and threshing has commenced, but will not be general for a week. In the central and northern districts, where backward weather has delayed the ripening of the grain, the cutting of wheat is from 40 to 60 per cent completed, with the threshing done. The weather in these districts during the past fortnight has been characterized by several warm sunny days which have ripened the wheat to the harvesting stage. The oat crop is still rather green, however, and is being harvested at a slower rate. The grain and cool weather of the past few days, very small percentage of the oat and barley crop is cut.

Total Acreage The total acreage in wheat in the province has been finally set at 2,081,091 acres compared with 2,077,325 acres in 1923. The acreage in fall wheat is set at 35,125 acres compared with 30,160 in 1923. The reason for the increase is that the department believes that last year's crop was a poor one. The increase in the acreage of fall wheat is also due to the fact that the department believes that last year's crop was a poor one.

It is estimated that about 12 per cent of the total wheat acreage has been harvested.

Work Resumed on Alberta Farmers Have a Hay Pool

A Co-operative selling organization which really amounts to an Alberta hay pool was effected in Lethbridge Saturday when the Fischer Creek and Goudale hay growers entered into a selling agreement for the disposal of the 1924 hay crop. The Fischer Creek Co-operative selling association and the Southern Alberta Co-operative association are the contracting parties. These bodies retain their own identity in the actual selling of their product, but they will be working under one name.

Each local association will have full responsibility for the collection, grading and loading of their hay. They will have no say in the actual selling of their product, but they will be working under one name. The central selling organization will be incorporated.

Praises Canada's Wheat Grading System

Canada has a wonderfully efficient selling system for its wheat grading and certificate system, said George Walker, managing director of the Canadian Wheat Board, when he spoke at the meeting of the board on Tuesday. All members of the board were present at the meeting.

There is no doubt in my mind that the Canadian wheat grading system is one of the best in the world. It is a system which has been developed by the Canadian Wheat Board, and it is a system which has been developed by the Canadian Wheat Board.

Australia had no efficient grain handling system or grain exchange, said George Walker, managing director of the Canadian Wheat Board, when he spoke at the meeting of the board on Tuesday. All members of the board were present at the meeting.

ENGLISH MAIDS COMING

More than one hundred domestic servants, including a large number of English maids, are expected to arrive in Alberta this year. They will be working on the farms and in the households of the province.

Weekly News Bulletin

Issued by Publicity Commission, Government Buildings, Edmonton

Placed With Tar Sands

Alberta's tar sands have been placed in the north country recently, and the population of the province has been increased by the arrival of the tar sands.

Four new towns have been created in the north country recently, and the population of the province has been increased by the arrival of the tar sands. The towns are located in the north country, and the population of the province has been increased by the arrival of the tar sands.

Sugar Beet Possibilities

It is now some years since the sugar beet industry in Alberta has been successful. The industry has been successful in the past, but it has not been successful in the present.

Schools of Agriculture Open

The provincial schools of agriculture at Olds and Charlevoix will open their doors to the students of the province on September 22. The schools will be open for the purpose of teaching the students of the province the art of agriculture.

New Election Act in Effect

The new election act of the province has been in effect since September 1, 1924. The act has been in effect since September 1, 1924, and it has been in effect since September 1, 1924.

Edmonton By-Election Operators Do Not Support Strickers

It now appears probable that there will be four candidates in the field in the Edmonton by-election. It is now almost certain that Liberal, Conservative and Labor will have a candidate in the field. Labor has already decided upon its candidate but as is always the case with a strong Communist in the party it is not though he will get the support of the government. For this reason the U. F. A. of the district have called a convention for next week to nominate a government candidate.

World Shortage of Wheat This Year

A world shortage of wheat of 371,000,000 bushels as compared with last year, is estimated in a report received yesterday at Ottawa from the International Wheat Council, an international body, Rome, Italy. Great Britain, Scandinavia, Germany, France and Italy, which importers of wheat, the latter through drought, the former through the war, have suffered great losses in crop.

Says Britain Violated The Russian Empire

Bitter resentment is manifested by soviet officials and newspapers over the decision of the League of Nations assembly to investigate the recent uprising in Georgia.

The soviet officials insist that the league has no right to investigate, and that the investigation is a violation of the league's charter. The soviet officials also insist that the investigation is a violation of the league's charter.

CANADA HAS LARGEST GOVT. RAILROAD SYSTEM

Canada has one mile of railway to every square mile of land, and is the largest of any country in the world. The Canadian government owns and operates the largest railway system in the world.

LIVE STOCK POOL IS MAKING GOOD PROGRESS

That satisfactory progress is being made in the organization of the provincial livestock pool, is the statement given out by the members of the pool on Tuesday. All members of the pool were present at the meeting.

DEMAND FOR HOMESTEADS

There is a demand for a brick road for homesteads in northern Alberta. The demand is for a brick road for homesteads in northern Alberta.

Here and There

It is anticipated that English orders for Canadian wool will be a considerable increase over the business of 1923, amounting to 100,000 pounds.

ARE STILL INVENTING HORRIBLE WAR WEAPONS

New developments in aerial warfare that render certain war methods of strategy obsolete were described yesterday by U.S. government experts before a gathering of scientists in Philadelphia in honor of the centenary of the Franklin Institute.

NEW HEAD OF RAILWAY BOARD IS APPOINTED

Chief Justice H. McKeown, of the King's Bench, has been appointed head of the new Brunswick railway board, succeeding the late Frank Carleton. Judge McKeown has been appointed head of the new Brunswick railway board.

GRAIN MARKET

The following were the cash prices at Winnipeg yesterday:

No. 1 Northern	145 1/2
No. 2 Northern	145 1/2
No. 3 Northern	138 1/2
No. 1 c.w.	145 1/2
No. 2 c.w.	145 1/2
No. 3 c.w.	138 1/2
No. 1 w.	145 1/2
No. 2 w.	145 1/2
No. 3 w.	138 1/2
No. 1 f.w.	145 1/2
No. 2 f.w.	145 1/2

Operators Do Not Support Strickers

For the past few months Canadian operators have been on strike and a movement was on foot to get all operators in the several commercial systems to join out of sympathy. By a vote of almost three to one, however, the C. P. R. operators decided not to strike.

It is stated that the Canadian Press operators needed the support of the commercial telegraph in order successfully to carry on their strike. The decision of the C. P. R. operators will have an important effect throughout Canada, and it is hoped that the operators will be in operation again in the course of a few days. In the meantime, the world telegraph news service improved last night with commercial operators carrying news reports. The news service of the dailies will be greatly improved as a result.

Will Test The U.S. Murder Laws

In Chicago a few months ago a student read that a Harvard student, a friendless pauper, was executed, was tried, charged with the shooting of a woman in Chicago. The student's evidence was found guilty of murder. The student's evidence was found guilty of murder.

This month in the same city two boys were sentenced to death for kidnapping and murder. The boys were sentenced to death for kidnapping and murder. The boys were sentenced to death for kidnapping and murder.

New movement is on foot to get the Canadian government to take a large responsibility for getting the self-sufficient border off with a life sentence, which means a life sentence. The movement is on foot to get the Canadian government to take a large responsibility for getting the self-sufficient border off with a life sentence.

Old Country Settlers Pleased With Alberta

Satisfaction at the way in which their countrymen are settling down to work in Alberta was expressed by a group of old country settlers who were brought to Alberta by Father Macdonald, a priest of the Scottish and Irish settlers for the past 20 years.

When talking to land settlement agents, the old country settlers expressed their satisfaction with the way in which their people had adapted themselves to the new country.

Few of the old country immigrants have been brought to Alberta by Father Macdonald, a priest of the Scottish and Irish settlers for the past 20 years. The old country immigrants have been brought to Alberta by Father Macdonald, a priest of the Scottish and Irish settlers for the past 20 years.

HERE AND THERE

It is anticipated that English orders for Canadian wool will be a considerable increase over the business of 1923, amounting to 100,000 pounds.

Approximately 60 per cent, or 1,000,000 pounds of wool, this year, which will be a considerable increase over the business of 1923, amounting to 100,000 pounds.

Western Canada live on occupied farms. Of the balance, 474,316 bushels of wheat, 20,000 bushels of barley, 2,500 and 228,948 of 2,500 small towns and villages of 2,500 or under.

THE WORK OF REHABILITATING THE MAIN LINE OF THE CANADIAN PACIFIC

The work of rehabilitating the main line of the Canadian Pacific between Montreal and Toronto (the Lake Ontario branch line) has just been completed. Nearly 2,000,000 bushels of wheat, 20,000 bushels of barley, 2,500 and 228,948 of 2,500 small towns and villages of 2,500 or under.

Subsided Strawberry Culture 800

million north of the international boundary has been given up by the R. A. Gordon, of Edmonton, Alta. One hundred plants brought from Ontario watered well, blossomed and produced a fine crop of strawberries.

Australian Boys Here

The party of 41 Australian boys who have been visiting Canada have been entertained in Edmonton this week-end.

TEA is good tea

and the choicest of Red Rose Tea is the ORANGE PEKOE QUALITY

A National Failing

Government departments at Ottawa and at the various Provincial capitals have for many years been engaged in continuing educational campaigns, fastening instructive bulletins, pamphlets and posters, designed to encourage and help people in the conduct of their own particular enterprises and thereby produce not only individual, but national progress and prosperity. Every body is more or less familiar with work along these lines conducted by the departments of Agriculture and Health.

The Post Office Department at Ottawa has recently found it necessary to adopt similar methods. Not the least interesting and instructive among exhibits at this year's Summer Fairs in the West were those of the Post Office Department revealing the astounding carelessness of people in addressing letters and packing parcels entrusted to the postal service. The mass of parcels completely and incorrectly addressed matter, and carelessly packed parcels dumped into the post office every day is almost beyond belief.

People complete with heavy taxation, and clamor for high postal rates reduced to the old pre-war level, and at the same time, by their own gross carelessness, compel the Post Office Department to maintain an expensive Dead Letter Branch to correct these mistakes and prevent them from being returned to their owners. The Dead Letter Office in our Western Province had to deal with over 100,000 incorrectly addressed pieces of mail matter last year, and this is typical of the entire Dominion. While it is realized that one such incorrectly addressed letter or carelessly packed parcel means far more work, trouble and expense in handling than a score or even a hundred correctly addressed letters or properly packed parcels, some idea will be gained of the expense thus incurred.

Now it is in the Post Office Department alone that evidence accumulated showing the extent of this national failing carelessness. Canada is notorious as having one of the heaviest fire losses of any country in the world, by far the greater percentage of these fires due to carelessness. It would be hard enough if the enormous losses this sustained had to be borne wholly by the people responsible for them, but, unfortunately, the innocent suffer with the guilty, and people who themselves take every possible precaution against fire see their life's work swept away through the carelessness of others. Not only so, but all citizens, including those who take every care, are heavily taxed to maintain the fighting services and through the payment of unduly high premiums for insurance which the fire insurance companies are forced to levy on all because of heavy fire losses brought about by the carelessness of the few.

It would seem that the time has arrived when some drastic measures will have to be adopted. Perhaps it would prove effective if, following every fire, the matter how small, or how large, was referred to a committee responsible for the fire, and when that responsibility was established, as against the person or persons responsible the full cost of combating the fire and imposing damages on them, to compensate innocent parties sustaining loss through their carelessness of negligence.

Why, too, should the careful, hardworking farmer who industriously, year after year, strives to become a neighboring landowner be careless and negligent and allow his land to become infested with weeds which spread in all directions bringing inaccessible loss through a wide area? It is time all laws relating to noxious weeds were made more stringent and rigorously enforced.

Railway companies are doing their utmost to protect people at level crossings, but hardly a day passes but some unavoidable accident is recorded, the direct result of carelessness, negligence on the part of the individual, or downright foolishness. Since the advent of the automobile many an employer's hair has been turned gray and his nerves shattered through the rashness of his drivers. It is time that the Government should take steps to make some people act as though highway crossing signs read: "Don't stop, don't look, don't listen. This is a railway track. Dash full speed ahead."

A little carelessness in medicine, these things might be avoided. The world would result in enormous savings to the individual, the Government and the public generally, would prevent much suffering, and many life-long regrets. Careful people who do their full duty as citizens in these respects should not be called upon through heavy taxation to pay for the upshot of careless or senseless rendered necessary because of the carelessness of others. The responsible ones should be made to pay the bills. Until they are made to pay will, apparently, continue to be carelessness, which, let it be repeated, has become one of our greatest national failings.

Making Good On Farm

Man Proves Wisdom of Employing Boy From Juvenile Court

The problem of what shall be done with the wayward boy has been solved in part in Wisconsin by D. W. Norris, Milwaukee philanthropist, who several years has absorbed some of the output of the juvenile courts of Milwaukee and placed it on a 75-acre farm near Mukwonago, Wis.

At present there are sixty-seven boys on Norris farm, varying in age from 12 to 16 years. Nearly seventy per cent. of these come from "broken" homes, where the parents are divorced or separated, or where death has occurred among parents. Not all of the boys are wayward or the product of the juvenile courts, several being simply homeless lads.

Mr. Norris and his mother personally direct the operation of the farm, although they reside in their home in Milwaukee. A corps of assistants handles the details.

While all of the boys are given tasks that educate them in the care of purebred stock, in raising of fine crops and the marketing of farm products, including milk, butter, cheese, fruit and vegetables, the general tone of the place is to carry the lads, in a real way, getting away entirely from the idea of a "correctional institution, which the farm is not, in the opinion of state supervision. It provides recreation, discipline, education, health, home and maintenance, and the thing to make a normal American boy. There are school facilities on the property.

Although many of the boys come from the juvenile court, they are not for little or no restraint, they are not run away from the farm, and a number of them have been taken along on long trips by the Norris family.

THE DELICATE GIRL

What Mothers Should Do As Their Daughters Approach Womanhood

If growing girls are to become well-adjusted, healthy, and capable of handling the responsibilities of life, it is an imperative duty of mothers to establish a healthy mental and physical foundation for their daughters. This involves a careful selection of food, a regular exercise routine, and a proper understanding of the body's needs.

Remember, dear mothers, that your daughters are not just little girls, but future women. They need a strong, healthy body to support a bright, active mind. Encourage them to eat well, exercise regularly, and understand the importance of their health.

You can get these pills from any drug store. They are sold in a box for \$1.00. Write to the following address for more information: Dr. Williams' Pink Pills, 100 North Main Street, Montreal, P.Q.

Strawberries in Northern Alberta

Grown Successfully Three Hundred Miles North of International

Successful strawberry culture three hundred miles north of the international boundary, has been proven by J. A. Gordon, of Edmonton. One hundred plants brought out from Ontario yielded well. Most were heavily laden with fruit. The fruit was of excellent quality, and the plants were well adapted to the climate.

Sweet and palatable, Mother Graves' Worm Expeller is available in all drug stores. It is a safe and effective remedy for all types of worm infestations. It is sold in a box for \$1.00. Write to the following address for more information: Mother Graves' Worm Expeller, 100 North Main Street, Montreal, P.Q.

Movie Pictures On Mt. Robson

The first motion pictures ever obtained on Mount Robson, the highest peak in the Canadian Rockies, have been taken by Mrs. Andy F. Shipman, one of a party who made the ascent in June according to 1,187,650 feet. The pictures were taken in the fastest time recorded. Although the base of the mountain was enveloped in a thick fog for four thousand feet, the party could see for more than fifty feet above the record time of fourteen hours was made for the climb.

Many Birds Stronger Than Eagle Although many birds are known as the symbol of strength, there are many species of birds that are much stronger than the eagle. One such bird is the osprey, which is known for its incredible strength and ability to catch and carry large fish.

There may be other new remedies, but you will not be completely satisfied until you have used Holman's "Sole" remedy. It is a safe and effective remedy for all types of skin conditions. It is sold in a box for \$1.00. Write to the following address for more information: Holman's "Sole" remedy, 100 North Main Street, Montreal, P.Q.

Even a woman who is not desirous of walking in a way that will not suggest curves can get the desired result by using Holman's "Sole" remedy. It is a safe and effective remedy for all types of skin conditions. It is sold in a box for \$1.00. Write to the following address for more information: Holman's "Sole" remedy, 100 North Main Street, Montreal, P.Q.

As for sending a widow's broken heart, there is no doubt that it can be repaired. There are many ways to help a widow find comfort and happiness. One way is to provide her with financial support. Another way is to provide her with emotional support. Both of these things are essential for a widow to be able to move on with her life.

Jagan has a population of nearly 50,000 people. It is a small town, but it is growing rapidly. It is located in the heart of the province, and it is a convenient location for business and industry. It is a good place to live, and it is a good place to do business.

Minard's Liniment Relieves Pain

Reading By Sound

Recently Patented German Device May Aid the Blind

The blind may find "hears" the printed page by means of a recently patented German device for making printers' ink and other pigments conduct electricity.

This might seem a comparatively simple matter. One need only pulverize a conducting metal and mix it with powder with a suitable binder. But the lack of close contact between the particles of the metal obstructs the flow of the current, and the obstruction is increased by the oxidation of the surface of each particle. Even if the current succeeds in overcoming the resistance, the conductor is usually heated—a fatal fault in the case of a patient. Since there are various reasons why it is desirable for industrial purposes to have a patent that will conduct electricity without heating, the problem has engaged the attention of many investigators.

It has recently been invented in Germany and patented by the firm of Merz, who plan to use it in the printing industry. An important feature of the process is the use of mica, it paints and inks can be prepared which conduct electricity in varying degrees. It is therefore, in the future, to prepare strips of paper printed in symbols corresponding, for example, to the Morse dot-and-dash system.

Such printed strips can then be used for the purpose of obtaining an approximate idea of the content of a document and break contacts so as to sound a bell or a buzzer so that a blind person familiar with telegraphic code can hear the printer's ink talking to him.

Says Color Problem Constitutes Menace

Entanglement in "Red" Question Serious Says Sir Valentine Chiloe

The solution of the color question threatens to become the acid test of racial civilization. Sir Valentine Chiloe, former director of the foreign news department of The Times, in the House of Commons, said that the color problem is a menace to the world's peace. He said that the color problem is a menace to the world's peace because it is a problem that is not being solved by the world's leaders.

The revived racial and economic forces at work in India and elsewhere are a menace to the world's peace. It is not by the sword that England can hope to rule India. What is to be feared at present is not rebellion against English rule, but a steady estrangement of the best elements of India from the British Empire.

It was an evil day for the Occident if all the other political, social and economic problems with which it is faced in the Orient, come to be merged with the color problem. The color problem is a menace to the world's peace because it is a problem that is not being solved by the world's leaders.

World's Strongest Boy Married

Sixteen-Year-Old Girl Claims To Be World's Strongest

Saxon woman known as "The Strongest Boy on Earth," was married recently. At 16 years old, Dorothy Davies, who is known as "The Strongest Boy on Earth," is a very strong girl. She is known for her incredible strength and ability to lift heavy weights.

The bride, who is only 16 years of age, said for five months has been a pupil of Brown, who is now 17. After the ceremony the young couple went to a hospital fair at Cardiff to give their first show in a week's engagement.

By way of a preliminary, Brown fought a motor van, and, stripping two of the spokes of the rear wheel, lifted it into the air. He then lifted it into the air, and he then lifted it into the air. He then lifted it into the air, and he then lifted it into the air.

Fists performed later included crushing an axe to pulp in one hand; bending a bar of iron into the shape of a horseshoe; lifting a 100-pound weight on his chest, breaking an iron chain with his teeth and lifting four men on a table.

The bride performed feats with a 50-pound dumbbell and supported two men on a board.

One of World's Oldest Women Apparently authentic records indicate that "Maddie Jacey," a slave living in the Yosemite Valley, is 100 years old. She is believed to be one of the oldest women in the world.

Lucy lives in a typical Indian tepee, not far from Camp Curry, but she is not of Indian blood. She has difficulty in walking, but otherwise retains full possession of her faculties. She is a very old woman, and she is a very old woman.

Myroslaw Palusz, 18-year-old, is named from a university dedicated to the Holy Hood, or Cross, which originally came from the East.

Considerable Expansion Is Shown In Sheep Industry Both In Eastern And Western Canada

The sheep industry in Canada made considerable expansion during the past years. There was some decrease during the years 1921, 1922 and 1923, but the good prices which were maintained for lambs and the upward trend in wool prices has again stabilized the industry and the present tendency is to increase rather than decrease the size of flocks.

The estimated wool production of the Dominion for 1923 was 15,553,417 pounds. Of this amount from 30,000,000 to 1,000,000 pounds passes through the regular trade channels and is sold either in Canadian mills or is exported. The balance of the wool clip is worked up locally by farmers' wives, being spun into yarn for socks, mitts, underwear, sweaters and other articles of apparel.

The sheep resources of Canada are more or less unlimited in that there is abundance of waste lands in most of the provinces admirably suited for sheep raising. Furthermore, there are many farms, particularly in Western Canada, that as yet are carrying no sheep. The sheep resources of the Dominion are admirably suited to the raising of sheep in Eastern Canada, in the prairie lands and in the grain belt of Western Canada, the small flock of ten to fifty ewes is generally kept. These flocks are maintained at a little expense and return an excellent revenue for the labor required and money invested.

In the rugged mountainous regions of Canada and in some districts of Manitoba larger flocks of from one to several hundred head are kept. The sheep-raising conditions often by new settlers who may have been originally farmers or fishermen. There are still available many areas suitable for the carrying of flocks of this size. In the southwestern Saskatchewan, southern parts of Northern Alberta, and in British Columbia, sheep raising is practiced quite extensively, but even in these provinces there are still available for ranching or semi-ranching purposes.

Wool produced from Canadian sheep, both in the east and in the west, is of a very high quality for each respective grade. Eastern wools are all produced from the domestic breeds of sheep. They are very strong of fiber and bright in character. The bulk of eastern wools is medium combing and low medium combing with some fine medium combing and considerable quantities of medium and coarse. Eastern domestic wools have excellent felting qualities and are well adapted for the manufacture of medium and heavy weight goods, including serges and tweeds, rug, blankets, sweaters and underwear.

In Western Canada the percentage of domestic wools is steadily increasing. There is also a considerable amount of range wools which is increased considerably in the last few years. Western domestic wools are much the same quality as eastern wools although they probably run more to the finer grades. The nature of the soil and the character of the country tends to the production of a heavier shrinking wool. Soil-difficulties also detract from the quality of the fleece and so the above grades of western wool are subdivided into bright, semi-bright and dark. Wool produced from Western Canada wool sheep compares favorably with wool produced on other ranges areas of the world. The bulk of the range wools run to the fine, fine medium combing, and medium combing grades.

Wool grading, which was first instituted by the Dominion Livestock Branch in 1913, has done much to improve the market value of the Canadian wool. About twelve thousand sheep raisers now consign their wool for grading and co-operative sale. This constitutes about 80 per cent of the sheep raisers. The growers have their own marketing agency, the Canadian Co-operative Wool Growers' Ltd. This organization is an institution of some thirty wool growers' associations and branches and is a co-operative, organized for Government grading.

As a result of this grading, Canadian wools are now purchased freely on a graded basis in the United States and in Great Britain as well as by Canadian mills. The more extensive use of pure-bred rams is steadily increasing the percentage of the higher grades and, having in mind the present demand for breeding ewes, it is confidently expected that wool production will materially increase during the next few years.

Many of wool is not due to direct climatic action or the action of the elements, but is always the result of the activity of low forms of plant life which feed upon the wool and destroy it.

Natural Resources Bulletin

Necessary to Find Substitutes For Our Better Grades of Timber

The Resources Intelligence Service of the Department of the Interior at Ottawa says:

Time was in Canada when nothing but clear, white pine would be considered in building operations. While this was the standard lumber for practically all purposes, and the cut of this universally adaptable timber was enormous.

This demand of the market and recent fires have had their effect upon this favored species, however, with the result that white pine is not so plentiful as heretofore, and many other varieties have had to be substituted in building construction.

Spurce has largely taken the place of white pine. One-third of Canadian lumber cut is now obtained from spruce, while the Douglas fir of British Columbia furnishes about one-third.

With the advance in prices of pine and spruce, the hemlock is finding a large market. At first only the best grades of hemlock were saleable, but with the increasing scarcity of the better wools the lower grades have now come into use for purposes where a higher grade lumber is not required. Hemlock is a fairly soft wood, but is very strong. It holds nails well, and where it is kept dry or where it is constantly under water it lasts a long time.

The demand for lumber and the enormous losses of valuable species by forest fires are gradually leading to the use of lower grades of timber on the market. While at present those being used are quite satisfactory for ordinary construction, it is no question that we will continually have to find substitutes as our better timber grows scarcer.

Dip the Sheep in the Fall

Fall Dipping Just as Important as Spring Dipping

Sheep should be dipped at least once a year, and two dips, one in the spring and another in the fall, are advisable. Fall dipping is just as important as spring dipping, but, says Mr. MacMillan, Chief, Sheep and Swine Division, Dominion Department of Agriculture, in a four-page leaflet on sheep dipping, it is often neglected owing to the fact that ticks are more difficult to find, and farmers are led to think that once are present. A few ticks in the fall will multiply many times before spring. September or October are the best months for fall dipping. If the weather turns cold, the flock should be housed for a night or two until the fleeces dry. A few ticks in the fall will multiply many times before spring. September or October are the best months for fall dipping. If the weather turns cold, the flock should be housed for a night or two until the fleeces dry. A few ticks in the fall will multiply many times before spring. September or October are the best months for fall dipping. If the weather turns cold, the flock should be housed for a night or two until the fleeces dry.

Three or four dips in the fall will multiply many times before spring. September or October are the best months for fall dipping. If the weather turns cold, the flock should be housed for a night or two until the fleeces dry. A few ticks in the fall will multiply many times before spring. September or October are the best months for fall dipping. If the weather turns cold, the flock should be housed for a night or two until the fleeces dry.

Had Railroad Laws Before Railways

Ancient Act Recently Unearthed in Archives in Florida

The first enactment of Florida's legislators of the nineteenth century is disclosed in an old law unearthed in the archives of the state capital at Tallahassee. It is an act which became effective in January, 1835, and provided heavy penalties for employees of railroads found guilty of being intoxicated while in the performance of their duty.

At the time of its enactment there were no railroads in Florida. The act, however, imposed upon the general assembly the duty of making the greatest object of improvement in relation to railroads, canals and navigable streams, and indicates that the present-day lawmakers must have had that liquor and locomotive combined would not make for public safety.

Boys From British Isles

Fifty more boys from all parts of the British Isles arrived at Brandon recently under the auspices of the Salvation Army and were placed on board the ship which is to take them to the Salvation Army immigration scheme to arrive at Brandon, the first of two aggregating some two hundred boys, nearly all of whom are now settled on farms in the neighborhood.

Claims World's Record

A world's record for his senior two-year-old Holstein Friesian heifer, William, is claimed by W. Leake, Williamsburg, as the result of a 20-day test showing production of 5,785 pounds of milk and 12.25 pounds of butterfat equivalent to 142.25 pounds of butter.

Harvesting a man's feelings is a world's record, but his friendship.

The Dual Shortness Herd At Brandon

First To Be Declared Free From Tuberculosis and Officially Accredited

The cattle herd at the Brandon, Manitoba, Experimental Farm, consists of dual purpose Shorthorns, the foundation stock having been imported from England about twenty years ago. Since that time the milk-producing qualities have been improved and the herd has been improved from the standpoint of milk yield of type. When introducing new stock, care has been taken to obtain animals of good individual type and descended from good milk-producing ancestry. Poor females have been removed from time to time, until the present herd has reached a high state of excellence from the standpoint of both beef and milk production. This herd was one of the first to be declared free from tuberculosis and officially accredited.

Last year the milking herd numbered twelve head ranging in age from 2 to 8 years. During the lactation periods, extending from 237 to 488 days, the yield of milk ranged from 2,262 to 2,500 pounds, showing an average percentage of butterfat varying from 3.3 to 4.3 per cent. Valuing the milk at 14 cents per pound, the feed at 34 per cent for silage, 33 per cent for hay and barley straw, 210 per cent for hay, and 14 cents per pound for milk, the cost of producing hundred pounds of milk varied from \$5.00 to \$11.10. The cow, a seven-year-old, that produced over 2,200 pounds of milk, showed a loss of 24 pounds of live weight, whereas all the other members of the herd showed a profit ranging from \$19.50 up to \$45.84 per head.

The ration given the cows consisted of pasture during the summer supplemented by a meal ration fed in direct proportion to the amount of milk given by each animal. Each meal ration consisted of equal parts of cut chaff and bran. One pound of meal was fed to each cow for every 3 1/2 pounds of milk given. During the winter months the cows received as roughage, cut straw, alfalfa hay, corn and sunflower silage, and mangels. The feed is prepared by mixing the silage and cut straw together and feeding it twice a day, morning and evening. The meal ration is fed at the same time. Rents are given just before noon and the alfalfa hay early in the afternoon. These rations are given at the rate per day of silage, 40 pounds; mangels, 20 pounds; cut straw, 10 pounds; alfalfa hay, 30 pounds; and meal, one pound for every 3 1/2 pounds of milk given.

New Egyptian Find

Remnants of a civilization believed to be 12,000 years old have been uncovered by the British School of Archaeology in Upper Egypt. On the ruins of an ancient city, the ruins are in a very fine state of preservation, with a slender body, the head being still attached to a pointed chin, a large nose and thin lips.

The insurance agent advised a negro to take out an insurance policy. "You never know what may happen. And there's your wife to consider."

"Lawsy," said the negro, who was thoroughly married. "I ain't any to safe at home as I is, sah!"

Mr. Arthur Conner Doyle says that he added the name "Holmes" as the name of his detective firm simply because it was commonplace; and that Doyle was the surname of a friend against whom he once scored three hits at cricket.

Who has just been appointed Admiral of the Fleet, a position which places him in command of the whole British navy.

Stimulating Bees With Electricity English Farmer Has Special Seed

Heated and Lighted. These are quickening times, and even the busy bee is being made to work harder.

Stimulated by electricity, the bees of E. H. B. Matthews, of East Grinstead, Eng., have been ingeniously "jazzed" into working the year round.

Most of the work on the farm is done by electric power, including the heating of incubators, the milking of cows, and husking without sun-drying. "I have been able to induce the bees to start work outside the hive long before their usual time," said Mr. Matthews. "All the hives were brought together under cover in a special shed electrically heated and electrically lighted."

"After inducing the queen bee to lay more eggs before the bees began following their instinct of hibernation, their hives to collect honey."

"The shed containing the hives had been placed near an apple orchard. "Then at about a month before the bees had begun to think of venturing outside, thousands of my bees flew out every day and gathered honey at will from the apple trees."

"I believe I am the only beekeeper who can boast of apple blossom honey. It is different in taste, the heather honey and darker in color, but it makes excellent eating and has enabled me to place the first new honey on the market."

"The insurance agent advised a negro to take out an insurance policy. "You never know what may happen. And there's your wife to consider."

"Lawsy," said the negro, who was thoroughly married. "I ain't any to safe at home as I is, sah!"

Scenic Resources Of Canada Now Brought Within Easy Reach By Opening Roads For Motor Travel

Textile Shipment From Germany To U. S.

Have Returned Virtually To The Pre-War Basis

Textile shipments to the United States from Crefeld, the Elberfeld-Barmen district and other German manufacturing centers have returned virtually to the pre-war basis. Shipments of nearly all other commodities from Germany to America are far below normal, however, owing to the prevailing high prices, practically on everything manufactured in that country.

Many of the fabrics, containing chiefly of dress materials, silks, suit fabrics, and other articles for women's wear, are made especially for the American trade, on a mill or large scale, and on an average are of a higher quality than fabrics from any other country. Some of the textiles which have gone forward to the United States recently were continued prior to the occupation of the Ruhr by the French and Belgian forces in 1923, the delay in shipping the orders being due to the fact that for many months last year the plants in Germany were closed down by the war, and many of the plants were at a standstill as part of the German program of passive resistance.

The demand for high-grade dress materials is an great in the United States, according to textile manufacturers here, and that the American exporters can afford to pay the increased cost which in many instances is probably that of the period prior to the war.

Right Weight For Marketing Hogs Should Be Marketed At An Average Weight Of Two Hundred Pounds

Mr. MacMillan, Chief of the Sheep and Swine Division of the Dominion Livestock Branch, has this to say regarding the right weight for marketing hogs: Farmers who aim to market a high percentage of hogs of the select bacon grade, after first having made sure that their breeding stock is of the right type and conformation, should feed in accordance with the approved methods, and aim to market a hog at an average weight of two hundred pounds.

When a falling market would warrant selling at slightly lighter weight, without a risk of market might be taken. Any great deviation from the two hundred pound average will undoubtedly decrease the sale of under-finished hogs if early marketing is practiced, whereas, if it is exceeded to any great extent, the percentage of heavy hogs will result.

In another part of his "Handbook on Hog Raising," from which the above is taken, Mr. MacMillan, dealing with heavy and extra heavy grades, remarks that when clear-cut bacon is sold to marketing at the 200-pound average, very few hogs will be marketed at over weight, and the extra heavy grade, with few exceptions, will include only those held for breeding purposes which have proved sterile.

Output Of Creamery Butter Production Has Gone Up By Seven Per Cent

The quantity of creamery butter made in Canada in 1923 was 18,456,159 pounds, valued at \$5,598,608, an increase in quantity over the preceding year of 10,545,469 pounds, or seven per cent, an increase in value to \$3,440,726, or six per cent.

The average price per pound for the year was 31 cents in 1923 compared with 25 cents in 1922. The production of creamery butter in 1923 exceeds in quantity the production of any previous year and is exceeded in value only by that of 1920 when the average price per pound was 51 cents.

37,000 Harvesters Required An estimate of 37,000 harvesters for Western Canada was arrived at by the railway and employment officials at a meeting held a few days ago in the Grand National Hotel, Vancouver, B. C., on Wednesday. It is expected that 18,000 men will be available locally and from British Columbia, the remaining 19,000 to be brought from Western Canada.

Building In Saskatchewan Building construction in Saskatchewan was actually started during the month of June. The value of the work in June of 1923 was \$1,175 over the month of June, 1922. Building permits in June of 1923 for the first half of the year totalled \$230,347, and in Saskatchewan to \$236,130.

Most people are bawled in summer than in winter.

LEAGUE AS PEACE-MAKER

If the League of Nations never did another thing but start the present friendly rivalry of Britain and France on the subject of World Peace and Disarmament, it would have magnificently justified its existence. The two leading nations, one strongest on the field, and the other on the sea, are trying to outdo each other in evolving plans for international friendship before the great assembly at Geneva.

Premier Ramsay MacDonald's speech the other day on Compulsory Arbitration was the sort of statesmanlike talk the world has been waiting for. At the moment there were present the heads of 46 national delegations and as one man, rising solemnly to their feet, they gave assent to the British proposition that the solidarity and security of all nations should be strengthened by peaceful settlement of all disputes arising in the future.

This does not mean the end of war today or tomorrow, nor the scuttling of battleships and disbanding of armies within six months. But it means progress instead of stagnation in a war-breeding atmosphere. It shows that the responsible government leaders are in earnest in the pursuit of peace, and are ready to go farther than ever before to make it real and permanent in every civilized country.

In case arbitration decisions are not obeyed, how much security will Great Britain give, and how little military aid will satisfy France? That says the cable is the big query remaining, after the eloquent pleas of the two premiers. It will not be insurmountable to the neighboring peoples who fought side by side in that last desperate struggle for Liberty, if they are sincere in their activities for an end of bloodshed. And we know they are profoundly in earnest. They put MacDonald and Herriot in power as a means of realizing their intense desire for peace. The one great virtue of Socialism that appealed to them most was the ideal of a warless world, and they forgave many sophistries in the effort to accomplish one or two supreme objects.

The League of Nations, as the clearing house of Peace plans, beautifully fulfills its mission. Discussing the present situation the "Canadian American" a paper published in Chicago says: "As one of the pioneers in the movement to end war the United States must not only endorse and applaud its work from outside, but get in and share in the credit for the task of the hour when, at last, it is accomplished fact."

CHICAGO'S MURDER VERDICT

The murder case which has brought Chicago so much fame and not a little infamy, is now a thing of the past, and the two young perpetrators are already settling down to the prison routine which Judge Caverly has decreed shall last "for the rest of their natural lives." Luck was with them, according to public opinion, and they seem to share the general view.

Discussing the verdict a Chicago paper says:

"We shall never hang another murderer without a trial of the kind which we have seen in the trial of the two young men."

and victim whose deed, one in the heat of passion, or in the fumes of dope or moonshine, appears so much less despicable than the cold-blooded, calculating murder of Robert Franks. We shall recall the millions at the service of the defense in one case, and the scarcity of funds in the other, and will be tempted to think that Money is a big factor in our criminal courts, although of course, it had nothing to do with Judge Caverly's decision.

"Hanging is a relic of barbarism" is a familiar phrase and it is being repeated in connection with Loch and Leopold. We believe this is true, but it is one of the things we have preserved in self-defense, while waiting for man's moral evolution. In countries like Britain and Canada where it is administered with speed and impartiality, murders are scarce. In the United States, where the law's delay has made us notorious, life has become very cheap; men and women killed with pistol or poison at the terrifying rate (in 1923) of 88 per day.

"The point is, however, that, so long as punishment is an institution provided for murderers, few, if any, should escape. In the case of callous and premeditated killings, or of the remorseless of the law, and the treatment, and a wonderful reproduction of the head of a fighting man."

Among the speakers to address the great convention of the Association of Advertising Clubs of the World at London, England, to be held July 14-17, will be E. W. Beatty, K.C. Chairman and President of the Canadian Pacific Railway.

Medicine Hat Council has decided to furnish electricity free to all householders who wish to put lights on their verandahs. The idea is to help light the streets in this way. Since Redcliff's street lighting system is now practically extinct it might be a good idea if something like that were arranged here. The amount usually spent for street lights might be utilized in this way. There are a few cases in town where verandah lights are used and they make a big improvement in the lighting of the streets. If these were properly distributed and looked after by those who have them on their buildings the street lighting problem might be solved for this winter.

In a speech delivered at Dundee, Premier Ramsay MacDonald confessing to feeling "a little tired," said the price paid for the premiership was very high. He sometimes doubted whether anyone in future could ever hold the position more than twelve months. If all premiers would accomplish as much as has Ramsay MacDonald in his effort to bring about the peace of the world and put an end to wars the public would be content to let them retire after a year's service.

Here and There

British Columbia's agricultural production last year increased in value \$4,000,000 over the 1922 figures compiled by the provincial Department of Agriculture show.

A steady increase in the volume of wheat exports from Canada is noted in the monthly statement just issued by the Dominion Bureau of Statistics. In April, 1924, 6,000,463 bushels of wheat were exported, as against 5,143,354 in April, 1923.

Nearly 60,000 bushels of high class seed were handled at the Alberta government seed-cleaning plant during the past season. A total of 52,283 bushels of Macquarie wheat seed was handled, 1,100 bushels of rye wheat, 23,073 bushels of Victory oats, 17,682 bushels of Statens oats, and 684 bushels of Barley's Barley.

Three prizes for eagles at the longbow camps on French River, Nipigon River, and the Lake of the Woods, have been offered to Canadian fishermen by the Canadian Pacific Railway. The trophies are three replicas of the bar, and the trout, and a wonderful reproduction of the head of a fighting man."

Among the speakers to address the great convention of the Association of Advertising Clubs of the World at London, England, to be held July 14-17, will be E. W. Beatty, K.C. Chairman and President of the Canadian Pacific Railway.

Canada's national wealth in 1921 was \$22,195,000,000, according to a report just issued by the Dominion Bureau of Statistics. In the tabulation, agricultural wealth comes first with \$7,982,771,195, nearly 36 per cent of the total and about 35 per cent of population. The Western provinces lead, the Yukon topping the list with \$4,054. The first in absolute wealth was Ontario, to which is credited the sum of \$7,259,000,000, or thirty-three per cent of the Dominion total.

Shipping in and out of the port of Vancouver, B.C. for the calendar year 1923, showed an increase in all departments, according to the annual report of the Board of Harbor Commissioners. Over \$185,000,000 worth of goods were exported, an increase of \$50,000,000 over the value of the 1922 exports, while the imports totalled \$224,000,000, an increase of \$13,000,000 over the 1922 figures. Vessels numbering 12,608, representing a total of 1,677,081 net tons, entered and left the port in 1923, an increase over 1922 of 2,919 ships and 792,259 tons.

A party of 200 Canadian Weekly Newspaper Editors and their wives left for Europe on June 11th aboard the Canadian Pacific steamship "Kalla." The party will visit the battle-fields of France and Belgium, seeing most important points in these countries, including Brussels and Paris and will be received by King Albert. Later they will tour England and Scotland and are to be presented to the King and Queen at Buckingham Palace on Dominion Day. Returning on the Canadian Pacific steamship "Montclair," they will visit Belfast where Sir Robert Baird, head of the Belfast Telegraph, will entertain them. They dock at Quebec on August 6th.

Interviewed in Vancouver as to the success of the round-the-world cruise completed on May 24th by the "Empress of Canada," E. W. Beatty, said:

"To gauge the success of the 'Empress of Canada,' round-the-world cruise one has only to ask the passengers their opinion of the entire trip. I spoke to several while crossing from Victoria and with exception they all expressed their complete satisfaction with the ship, its officers and the arrangements made and carried out since the day we left Vancouver, almost five months ago."

"It is good enough for me. It is simple demonstration that the Canadian Pacific can successfully conduct cruises in competition with any organization in the world and maintain that company's standing as a credit to Canada. The 'Empress of Canada' has carried the Canadian flag over the seven seas and into most of the world's great ports, and the missionary work she has done for Canada in the various countries touched should not be lost sight of. As one result of the undoubted success of this cruise, we look forward with renewed interest to the Canadian Pacific cruises of next season. The trip to the West Indies, the Mediterranean and another round-the-world cruise which will be made by the 'Empress of France,' already overhauled and fitted with a view to providing the greatest possible comfort for her passengers. The experience gained this year will greatly help in enabling us to make these cruises even more successful than those recently completed."

MORE SCOTTISH BRIDES FOR CANADA

The number of Scottish brides who have sailed from Glasgow to Canada this year, has been rather striking. Many of these young ladies are going to prospective husbands who have only been a short time in Canada. Here is a drinking group, on board the Canadian Pacific Liner "Martha." Mr. Andrew MacLeod, the Gaelic singer, is in the centre of the group. The brides, from left to right are: Miss Andrew (Melbourne); Miss Graham, (Edinburgh); Miss Dunn and Miss Blair (Glasgow);

Interesting Local Items

Mrs. H. Leppard returned this week after spending the past month visiting friends in Spokane.

Mr. and Mrs. Colhart of the Bowell district left this week for the east to visit friends.

W. Yates, who was spending his holidays at Vancouver, returned home yesterday.

The usual Friday and Saturday evening shows at the Redcliff will be called off this week on account of the carnival in Medicine Hat.

Medicine Hat appears to be making good progress in raising funds to build a large \$200,000 skating rink in that city for this winter.

Mrs. Blair and Miss Gray returned home Wednesday morning after spending a month visiting friends at the Pacific coast.

The car stolen in front of the theatre in Medicine Hat ten days ago was found in the ditch near Strathmore. The car was badly wrecked.

Mrs. T. S. Paton, who is a member of the provincial board of the W.M.S. in Edmonton this week attending a meeting of the board in First Presbyterian Church.

Those who went duck shooting last Monday report the ducks very scarce. All the old favorite sloughs and lakes in this district are practically dried up this year.

R. S. Hodge, D. D. G. M. for this Masonic district, paid an official visit to Mississauga lodge in Medicine Hat last Tuesday. A number of local Masons accompanied him and report a pleasant and profitable visit.

Mr. and Mrs. J. Allenback who have been holidaying around Yellowstone park and visiting friends in Spokane, returned home this week. John reports having some good hunting and fishing along the mountain slopes.

An auction sale of shorthorn draft horses will be held by the Alberta Horse Breeders Association during the fall stock show which is to be held in Calgary, Friday, Nov. 4th. The sale will commence at 1:30 in the Horse Show building.

A Medicine Hat man was fined \$5.00 and cost of sentencing to put a two cent revenue stamp on a receipt which he had given in acknowledgement of a payment of \$10.00. It should be remembered that all receipts given for amounts over \$10.00 should have a revenue stamp affixed to it.

This week we had a taste of real fine luscious cherries grown in Redcliff. They were also of the regular cherry and had a flavor all their own. The cherries were grown by Mrs. Lakey in her garden in the west end of town. There is no fruit to what can be grown in this country with a little attention.

The final game in the McCallan cup series was played in Medicine Hat last Saturday evening when a hot two hour battle was fought between the Vets and the Callies. The Vets won by the narrow margin of 1 goal to 0. This finishes the schedule for the season and the trophy will be awarded. The Vets won the McCallan cup, the Callies the trophy of the World's Cup and the Callies the league cup.

The swimming pool was still popular during the hot days the first part of the week.

Burglars entered the office of Laidlaw and Blanchard in Medicine and relieved the cash drawer of \$48.50.

Miss Nora Burdett left for Strathmore this week, where she will stay for the next month.

Owing to ill health J. Lusk has been forced to discontinue his shoe repairing business. G. N. P. Lusk has sold his stock and is having it moved to his own stand just south of the post office.

Mr. and Mrs. Jan Huggill who have been visiting Mr. and Mrs. T. A. Hiles for the past week, left yesterday for their home near Toronto. Mr. and Mrs. Huggill are returning east after spending the summer at the Pacific coast.

H. O. Williams, of Minneapolis, one of the directors of the Brick and Coal plant here, was in town for a few days this week inspecting the brick plant and mine. He found everything in a satisfactory condition. Before returning home, Mr. Williams took a trip through the Canadian Rockies.

Here and There

More than one hundred and fifty traders from the Fair North arrived in Edmonton, Alta., recently bringing with them for sale to the value of approximately \$500,000.

Tarzan Second, the largest wooden tower in the world, was launched recently at the Wallace shipyards, Vancouver, B.C. She is 1,000 tons burden and has 200,000 feet of British Columbia lumber in her make-up. The tower is to be used as a carrier for a great platform for Sydney E. Jenkins Company.

Two dinosaurs have been located in the Red Deer Valley, Alta., near the Canadian Pacific Railway line this summer, by the University of Toronto, expedition, composed of three scientists who prospect for several weeks in the gorge and are carrying up the prehistoric monsters for shipment to the Royal Ontario Museum. Another skeleton has been located by the Geological Survey of Canada.

One of the outstanding features of Canadian trade with the Orient during the past year or so has been the remarkable increase in wheat flour exports. Imports of Canadian wheat flour into Hong Kong in 1925 was the largest on record, showing an increase of 100 per cent in volume over those of 1922. The figures are as follows: 1925, 79,355 barrels, valued at \$130,000; 1924, 191,281 barrels, valued at \$240,044.

Zane Grey, the famous novelist, recently caught a 733 pound tuna fish, constituting what is believed to be his world's record. The sea monster was successfully conquered after three hours and ten minutes of grilling under the Nova Scotia coast, and towed into Liverpool harbor. Mr. Grey's prize was a specimen of the blue fin mackerel. The record before this catch was held by J. K. L. Ross, the well-known Montreal sportsman and financier, who caught a 710 pound tuna.

One of the most remarkable achievements in art printing yet produced in Canada and one which is really disposed of the price that such work cannot be satisfactorily handled by Canadian firms is found in the new booklets issued by the Canadian Pacific Railway dealing with the forthcoming 1926 Round the World cruise of the company's steamship "Empress of France." The booklet contains 40 pages of text and color illustrations, the latter exquisitely combining many brilliant hues in a number of highly imaginative designs.

Canadian Pacific gross earnings for July totalled \$1,528,577 as against \$1,577,535 for the same month of 1925. But in order to meet this reduction, operating expenses were reduced by \$1,528,577, the same for the month being \$1,528,577, as compared with \$1,528,577 for July, 1925. Thus the net earnings for the month showed an increase of \$200,000 over those of the same month a year ago. For the 7 months of the year to July 30 gross earnings showed an increase of \$1,528,577, as compared with \$1,528,577 for the same period of 1925; operating expenses an increase of \$1,528,577 and net earnings an increase of \$1,528,577.
